Company profile

A company profile introduces a business's mission, goals, vision, and history.

We will display our products and display part of the company's projects

About company

Jet Company is one of the companies specialized in the field of manufacturing heat exchangers (central air conditioning evaporators - central air conditioning water condensers _ oil heat exchangers _ steam heat exchangers _ water water heat exchangers).

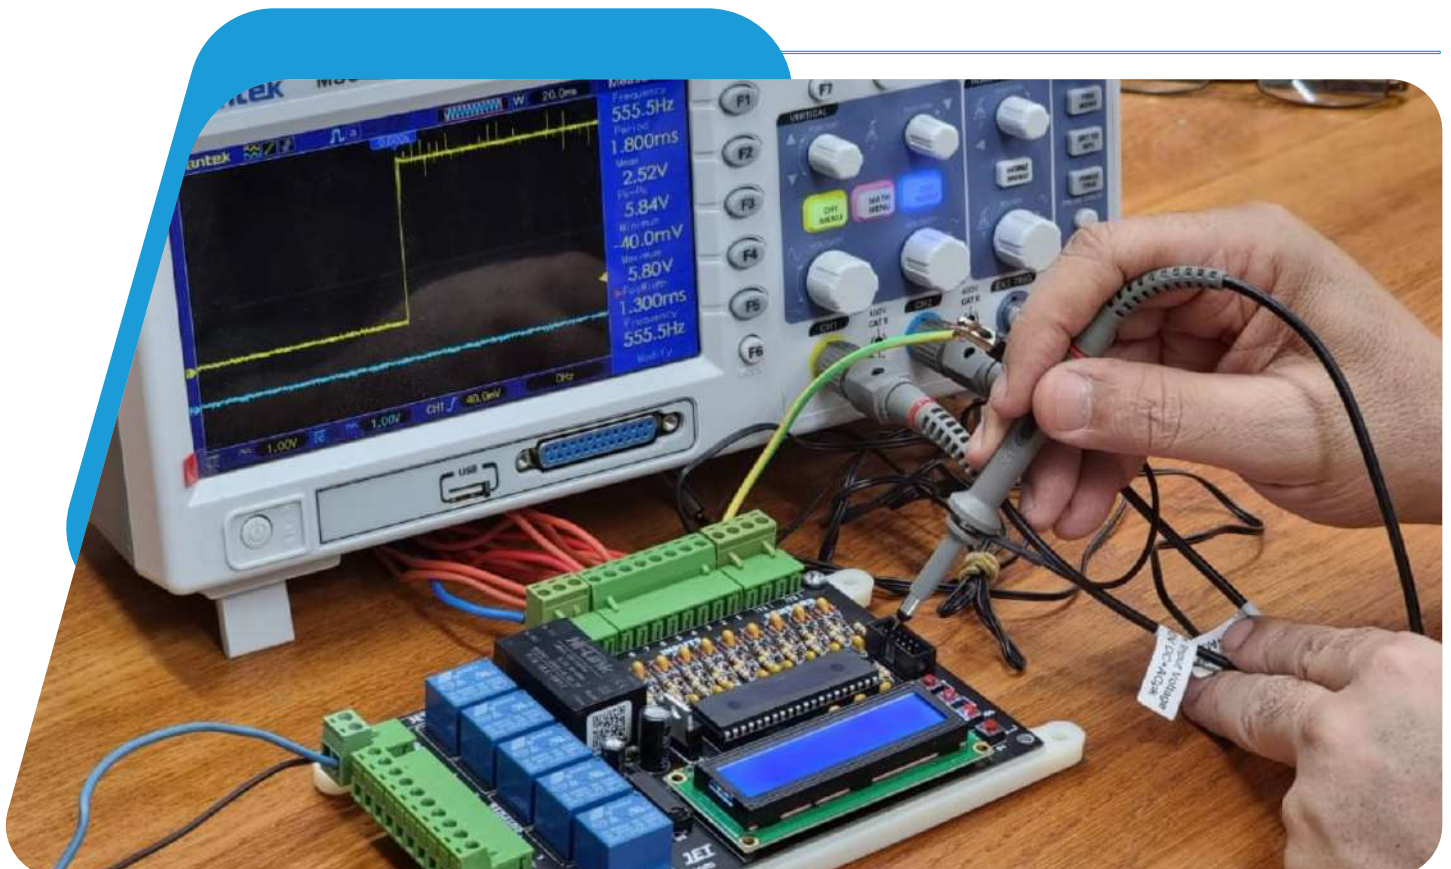

Also specialized in manufacturing chillers controllers and central air conditioning controllers.

The company's manufacturing for chillers controllers is a strong competitor in the Egyptian market and the global market.

The company provides engineering solutions in cooling or heating by designing heat exchangers suitable for all existing problems.

Jet has carried out several projects and engineering solutions in the largest companies inside and outside Egypt.

Jet company relies on the latest manufacturing methods for heat exchangers, and relies on the latest manufacturing machines.

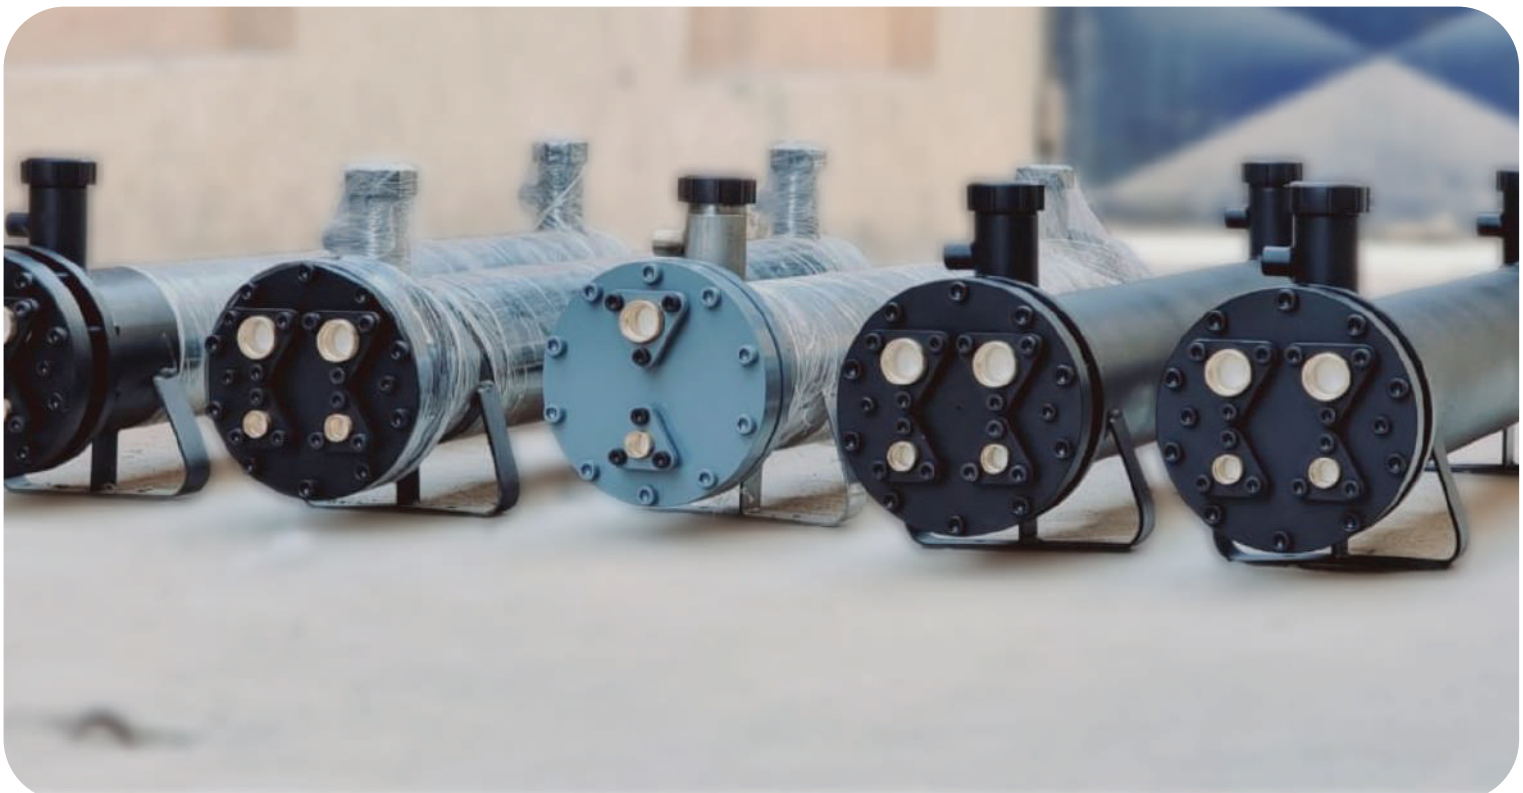

Mission

The company aims to transform all services into distinguished services at the best prices so that the customer obtains complete satisfaction during and after the completion of the sale process

The company aims to achieve the difficult equation that the customer desires, which is appropriate price and high quality.

Vission

To become one of the largest international companies specialized in manufacturing all kinds of heat exchangers and chillers controllers.

Company products

1 Shell and tube evaporators

The company manufactures different capacities of evaporators, capacities ranging from 10 kw to 2000 kw.

**The company offers evaporators starting from one to four circles
The company also provides evaporators made of stainless steel that are resistant to rust and are resistant to chemicals, with special specifications according to the customer's requests.**

2 Shell and tube condenser

The company manufactures different capacities of condensers, capacities ranging from 10 kw to 2000 kw.

The company also provides condensers made of stainless steel that are resistant to rust and are resistant to chemicals, with special specifications according to the customer's requests.

3 Shell and tube steam heat exchanger

The company manufactures all kinds of steam shell and tube exchangers with different capacities, according to the customer's request.

The company also provides steam heat exchanger made of stainless steel that are resistant to rust and are resistant to chemicals, with special specifications according to the customer's requests.

The company has provided many solutions for food factories and pharmaceutical factories.

4 Shell and tube water water heat exchanger

Manufacturing all kinds of water exchangers of all sizes based on requests.

The company also provides water water heat exchanger made of stainless steel that are resistant to rust and are resistant to chemicals, with special specifications according to the customer's requests.

5 Shell and tube oil cooler

Manufacturing all kinds of oil exchangers of all sizes based on requests.

The company also provide oil heat exchanger made of stainless steel that are resistant to rust and are resistant to chemicals, with special specifications according to the customer's requests.

6 Chiller controller

We manufacture different types of chillers controllers.

We can control from the first chillers with one piston passenger up to 16 pistons.

A control is available that can control the electronic expansion
It is available in detail in the catalogs on the website

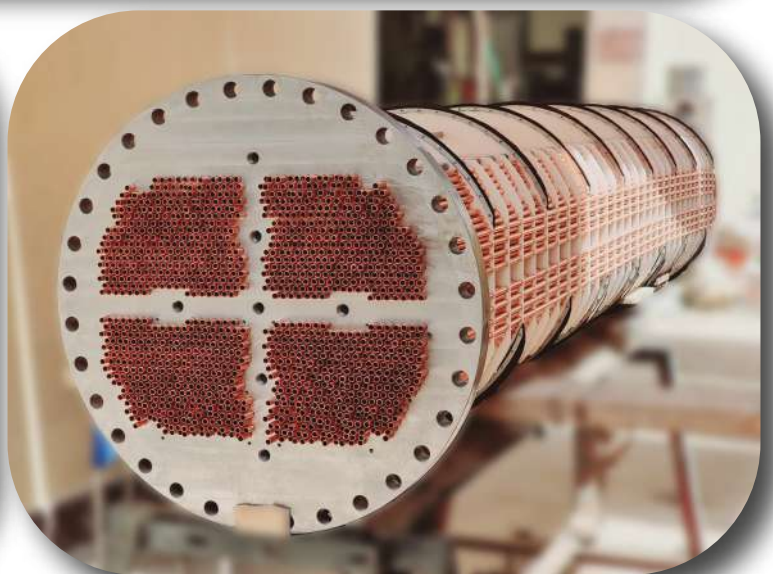

7 Special heat exchanger

The company has great flexibility in providing engineering solutions by manufacturing heat exchangers with special specifications according to project specifications and requirements.
